Mr. Raymond E. Bluff, President
Mingus Constructors, Inc.
P.O. Box 1999
Cottonwood, AZ 86326

Dear Mr. Bluff:

As operator of record on the Pebble Puppy #2 Placer Mining Claim (UMC 236372), located in Sections 6 and 7, T5S, R24E, SLB&M, Uintah County, Utah, you are responsible for any disturbance you have caused since September 22, 1989, on that location.

Your operation has been idle since October 30, 1989, and is now in an abandoned state. Unnecessary and undue degradation is now taking place on the public land at this location due to erosion of the disturbed area, especially the disturbance adjacent to the Green River. There is also a potential public safety hazard caused by a ten-foot unsupported highwall in the loose alluvial gravels.

Consequently we must know your company's intentions. If you do not intend to continue your operations by next spring, then you will be required to reclaim the operational area at that time. This will include removing any equipment, construction materials, and supplies, plus backfilling any excavations, replacing topsoil, leveling the surface to a natural contour, and reseeding. You are to notify this office before starting any reclamation. A seeding mixture and recommended periods to seed will be given to you.

Please advise me in writing by December 15, 1990, as to what your intentions are in this matter.

Sincerely,

Gregory Darlington
